

HD IR Vari-Focal Fixed Network Camera Quick Start Guide

Version 1.0.2

Welcome

Thank you for purchasing our network camera!

This quick start guide is designed to be a reference tool for your system.

Please keep this start guide well for future reference.

Please open the accessory bag to check the items one by one in accordance with the list below.

Contact your local retailer ASAP if something is missing or damaged in the bag.

Before your operation please read the following instructions carefully.

1 . Electrical safety

All installation and operation here should conform to your local electrical safety codes.

The power shall conform to the requirement in the SELV (Safety Extra Low Voltage) and the Limited power source is rated 12V DC or 24V AC in the IEC60950-1. (Refer to general introduction) **Please note: Do not connect two power supplying sources to the device at the same time; it may result in device damage!**

We assume no liability or responsibility for all the fires or electrical shock caused by improper handling or installation.

We are not liable for any problems caused by unauthorized modification or attempted repair.

2 . Transportation security

Heavy stress, violent vibration or water splash are not allowed during transportation, storage and installation.

3 . Installation

Do not apply power to the camera before completing installation.

Please install the proper power cut-off device during the installation connection.

Always follow the instruction guide the manufacturer recommended.

4 . Qualified engineers needed

All the examination and repair work should be done by the qualified service engineers.

We are not liable for any problems caused by unauthorized modifications or attempted repair.

5 . Environment

This series network camera should be installed in a cool, dry place away from direct sunlight, inflammable, explosive substances and etc.

Please keep it away from the electromagnetic radiation object and environment.

Please make sure the CCD (CMOS) component is out of the radiation of the laser beam device.

Otherwise it may result in CCD (CMOS) optical component damage.

Please keep the sound ventilation.

Do not allow the water and other liquid falling into the camera.

Thunder-proof device is recommended to be adopted to better prevent thunder.
The grounding studs of the product are recommended to be grounded to further enhance the reliability of the camera.

6. Daily Maintenance

Please shut down the device and then unplug the power cable before you begin daily maintenance work.

Do not touch the CCD (CMOS) optic component. You can use the blower to clean the dust on the lens surface.

Always use the dry soft cloth to clean the device. If there is too much dust, please use the water to dilute the mild detergent first and then use it to clean the device. Finally use the dry cloth to clean the device.

Please put the dustproof cap to protect the CCD (CMOS) component when you do not use the camera. Dome enclosure is the optical component, do not touch the enclosure when you are installing the device or clean the enclosure when you are doing maintenance work. Please use professional optical clean method to clean the enclosure. Improper enclosure clean method (such as use cloth) may result in poor IR effect of camera with IR function.

7. Accessories

Be sure to use all the accessories recommended by manufacturer.

Before installation, please open the package and check all the components are included.

Contact your local retailer ASAP if something is broken in your package.

1 Framework

1.1 Device External Cable

You can refer to the following figure for device external cable information. See Figure 1-1.

Figure 1-1

Please refer to the following sheet for detailed information.

SN	Port	Port Name	Connection	Note
1	LAN	Network port	Ethernet port	Connect to standard Ethernet cable.
2	DC 12V	Power input port	-	Power port. Input DC 12V.

1.2 Framework and Dimension

Please refer to the following figure for dimension information. The unit is mm. See Figure 1-2 and Figure 1-3.

Figure 1-2 Dimension illustration 1

Figure 1-3 Dimension illustration 2

2 Device Installation

Note:

Please make sure the installation surface can support the 3X weight of the camera and the bracket.

Step 1

Open accessories bag, take out installation position map and stick it to designated surface where you will install the device (wall or ceiling).

Step 2

Dig a hole according to position of hole on installation position map.

Step 3

Open accessories bag, take out expansion bolts and insert them into the holes you just dug.

Step 4

Open accessories bag and take out the self-tapping screws. Aim the expansion bolts to the installation holes on the device pedestal and fix the device on the installation surface (wall or ceiling) with self-tapping screws.

Step 5

Plug external wiring of the device properly.

Figure 2-1

Figure 2-2

Step 6

Use inner hex screwdriver to loosen adjusting screw shown in Figure 2-2.

Step 7

Adjust the device in all possible directions, and set its monitoring direction.

Step 8

Use inner hex screwdriver to tighten the adjusting screws.

Figure 2-3

Step 9

Screw out the pan head screw (shown in Figure 2-3) by cross head screwdriver and take off the lower cover.

Step 10

Adjust the lens focus lever and set its monitoring direction more accurately by external focus.

Step 11

Use cross head screwdriver to tighten the pan head screws.

3 Quick Configuration Tool

3.1 Overview

Quick configuration tool can search current IP address, modify IP address. At the same time, you can use it to upgrade the device.

Please note the tool only applies to the IP addresses in the same segment.

3.2 Operation

Step 1

Double click the “ConfigTools.exe” icon; you can see an interface is shown as in Figure 3-1.

In the device list interface, you can view device IP address, port number, subnet mask, default gateway, MAC address and etc.

Step 2

Select one IP address and then right click mouse, you can see an interface is shown as in Figure 3-2. Select the “Open Device Web” item; you can go to the corresponding web login interface.

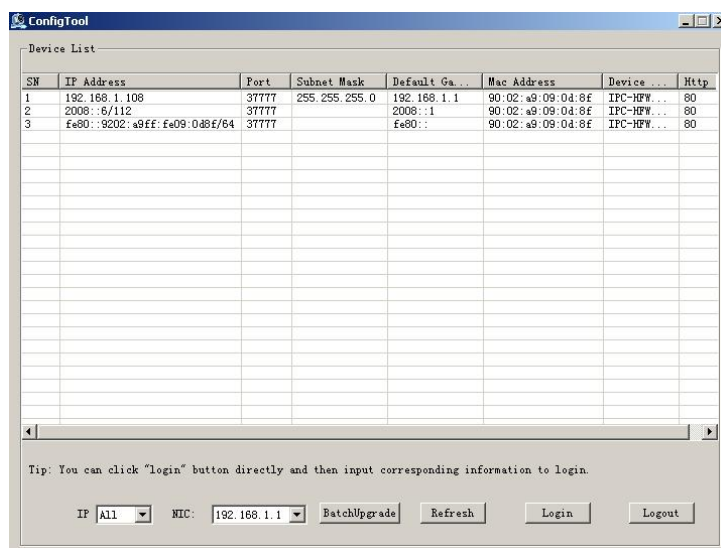

Figure 3-1 Search interface

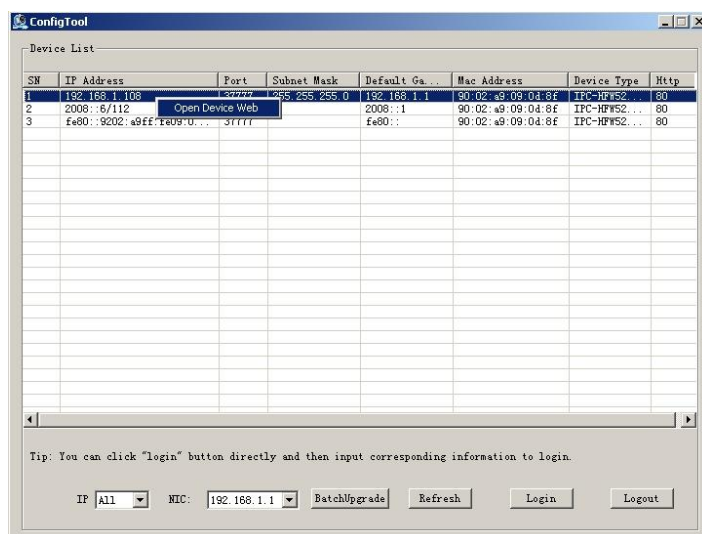

Figure 3-2 Search interface 2

Step 3

If you want to modify the device IP address without logging in the device web interface, you can go to the configuration tool main interface to set.

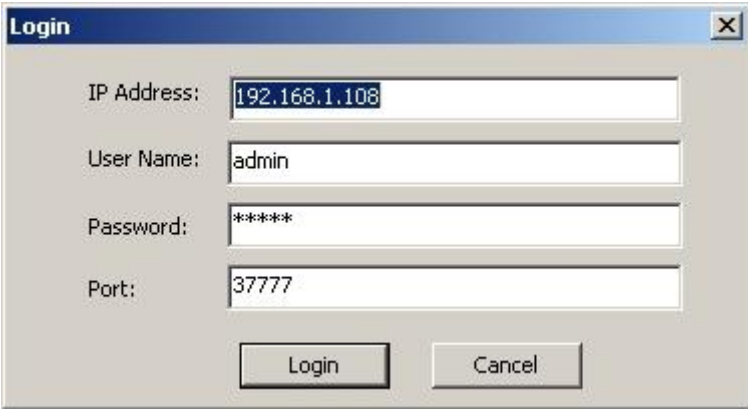

In the configuration tool search interface (Figure 3-1), please select a device IP address and then double click it to open the login interface. Or you can select an IP address and then click the Login button to go to the login interface. See Figure 3-3.

In Figure 3-3, you can view device IP address, user name, password and port. Please modify the corresponding information to login.

Please note the port information here shall be identical with the port value you set in TCP port in Web Network interface. Otherwise, you cannot login the device.

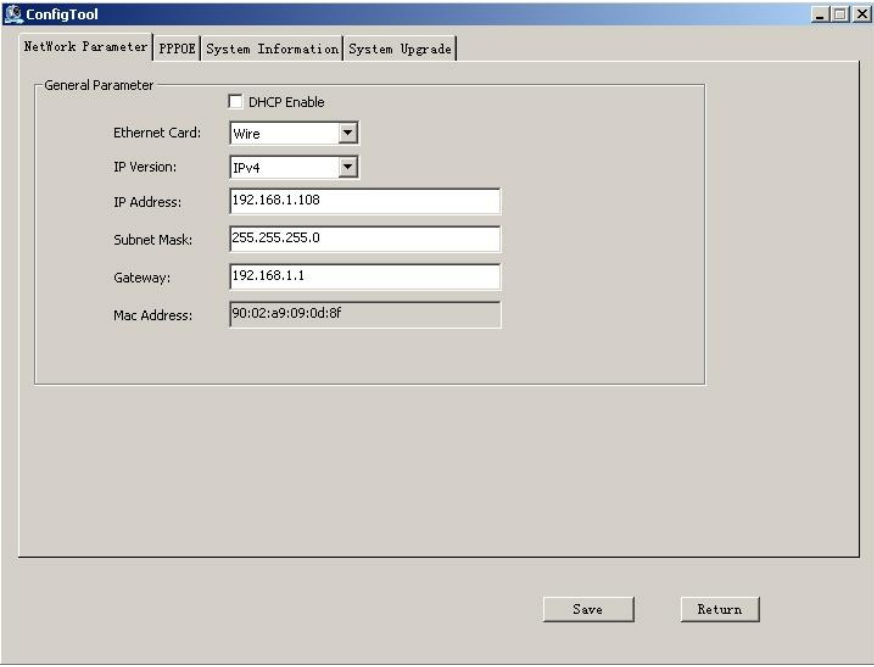

If you are using device background upgrade port 3800 to login, other setups are all invalid.

After you logged in, the configuration tool main interface is shown as below. See Figure 3-4.

The image shows a 'Login' dialog box with a blue title bar and a close button. It contains four input fields: 'IP Address' with the value '192.168.1.108', 'User Name' with 'admin', 'Password' with '*****', and 'Port' with '37777'. At the bottom, there are two buttons: 'Login' and 'Cancel'.

Figure 3-3 Login prompt

The image shows the 'ConfigTool' main interface. It has a blue title bar and a menu bar with 'Network Parameter', 'PPPOE', 'System Information', and 'System Upgrade'. The 'Network Parameter' tab is active, showing a 'General Parameter' section. This section includes a 'DHCP Enable' checkbox (unchecked), an 'Ethernet Card' dropdown menu (set to 'Wire'), an 'IP Version' dropdown menu (set to 'IPv4'), and input fields for 'IP Address' (192.168.1.108), 'Subnet Mask' (255.255.255.0), 'Gateway' (192.168.1.1), and 'Mac Address' (90:02:a9:09:0d:8f). At the bottom, there are 'Save' and 'Return' buttons.

Figure 3-4 Main interface

For detailed information and operation instruction of the quick configuration tool, please refer to the *Quick Configuration Tool User's Manual* included in the resources CD.

4 Web Operation

This series network camera products support the Web access and management via PC. Web includes several modules: Monitor channel preview, system configuration, alarm and etc.

4.1 Network Connection

Please follow the steps listed below for network connection.

- Make sure the network camera has connected to the network properly.
- Please set the IP address, subnet mask and gateway of the PC and the network camera respectively. Network camera default IP address is 192.168.1.108. Subnet mask is 255.255.255.0. Gateway is 192.168.1.1
- Use order ping `***.***.***.***`(* network camera address) to check connection is OK or not.

4.2 Login and Main Interface

Open IE and input network camera address in the address bar. See Figure 4- 1.

Figure 4- 1 IP address

The login interface is shown as below. See Figure 4- 2.

Please input your user name and password.

Default factory name is admin and password is admin.

Note: For security reasons, please modify your password after you first login.

Figure 4- 2 Web login

If it is your first time to log in, system pops up warning information to ask you whether install web plug-in or not after you logged in for one minute. For detailed plug-in installation, please refer to the Web Operation Manual included in the resource CD.

After you logged in, you can see the main window. See Figure 4- 3.

Figure 4- 3 Web monitoring window

Please refer to the Web Operation Manual included in the resource CD for detailed operation instruction.

Appendix Toxic or Hazardous Materials or Elements

Component Name	Toxic or Hazardous Materials or Elements					
	Pb	Hg	Cd	Cr VI	PBB	PBDE
Circuit Board Component	○	○	○	○	○	○
Device Construction Material	○	○	○	○	○	○
Wire and Cable	○	○	○	○	○	○
Packing Components	○	○	○	○	○	○
Accessories	○	○	○	○	○	○

O: Indicates that the concentration of the hazardous substance in all homogeneous materials in the parts is below the relevant threshold of the SJ/T11363-2006 standard.

X: Indicates that the concentration of the hazardous substance of at least one of all homogeneous materials in the parts is above the relevant threshold of the SJ/T11363-2006 standard. During the environmental-friendly use period (EFUP) period, the toxic or hazardous substance or elements contained in products will not leak or mutate so that the use of these (substances or elements) will not result in any severe environmental pollution, any bodily injury or damage to any assets. The consumer is not authorized to process such kind of substances or elements, please return to the corresponding local authorities to process according to your local government statutes.

Note:
